An investigation and suppression operation against the Vampires, B Organization, which was involved in the Puppet Soldier Plan, initiated around 2088.

The C.I.S.U., including Investigator Roy, Captain Sana and other members of the O.C.U. regular army, the Storm Team, a mercenary unit belonging to the O.C.U. military, and Tornado (formerly of the O.C.U.), who was in pursuit of Sana, who was kidnapped by Vampires. The independent unit led by Tornado (a former mercenary in the O.C.U.'s Chariot Corps), who was in pursuit of Sana, who was abducted by the Vampires, is participating in this operation, investigation, and suppression mission.

progress

2088.	Illegal government spending on new weapons development in the U.S.N. is discussed.
2088?	Investigator Roy of C.I.S.U. begins undercover work at Vampires. Henceforth, he calls himself the Dark Knight. Sana and Jose are on regular military duty, posing as mercenaries to hide their appearance, and begin field research on the organization behind the Vampires.

Chariot (Tornado) Squadron, Storm

Squadron

2089 Lancer.	(Dragoon) forced to Vampires They are forced to participate in the Storm Squad was formed, Rain, Champ, Odd. Ai enlisted. Buggy died. Defeated Griffon Eye. Gray enlisted. Joint operation with the Delta Corps and Freedom.	Tornado enlisted.

Search near Greylock.</p> <p>Protecting Romariaf in B wing of Freedom East.</p> <p>Investigated the ruins of a research facility east of Freedom and the ruins of the Parunta Desert.</p> <p>Infiltrated and investigated a research facility in Larkas, U.S.N. territory.</p>	<p>A battle ensued within the same base, but Raven took advantage of a runaway in the facility's power unit to blow up the base, causing it to completely collapse. Raven escaped.</p> <p>B Start research on the organization?</p>

項目別詳細

To simplify the explanation below, some parts of the timeline are back-to-back. For a more accurate timeline, see the table above.

Underground Investigation Begins into Abductions on Huffman Island

Around 2087, abductions of soldiers and mercenaries repeatedly occurred near the border of Huffman Island. In 2088, the U.S.N. government is accused of improper spending on the development of new weapons (bio-weapons?). The U.S.N. government was accused of improper spending on the development of new weapons (bio-weapons?).

In the same year? Investigator Roy of the C.I.S.U. began undercover work at Vampires. Numbers and thereafter called himself the Dark Knight.

In the O.C.U. military, Sana and Jose hide their identities as regular troops and begin a field investigation into the source of the abduction organization's request as the Chariot Squad, a mercenary unit.

Storm Squadron formed in place of Lancer Squadron and increased to Chariot Squadron.

In the summer of 2089, Lancer Squadron was attacked by Vampires, and Captain Lancer and six others were abducted. Lancer, who had taken the other members and their families hostage, succumbed to the Vampires' threats and joined the organization's activities as a Dragoon of Numbers. However, the hostages are murdered.

A few days after that abduction, Storm Squadron was organized and Rain, Champ, and Odd Eye enlisted (Gray enlisted late). Around the same time, Tornado enlisted in Chariot Squadron.

Odd Eye and his teammates and Toneedo attended tryouts together and are acquainted with each other, and have also held mock battles with the Storm and Chariot squadrons.

[Alchemists conduct operations in a mercenary base.

Alchemists infiltrate the 81st Mercenary Base for the purpose of capturing Rain and Buggy, and begin monitoring Storm and gathering information and conducting manipulation activities.

A baby carriage on a lone mission is attacked by a griffon eye and nearly dies. Storm team searching for the missing buggy discovers it, but confirms its death. The Griffon Eye is also destroyed.

Later, Alchemist, who was spotted by Storm at the scene of the informal communication, plots his escape and blows up the mercenary base facility. Unable to escape Storm's pursuit, he asks his friends to destroy his aircraft, and the Alchemist is killed.

It is likely that the Alchemist reported to the Vampires that the baby carriage went out alone, and the griffon released a force to capture the storm troopers.

[Storm team] Berserker team

Encountered a chimera (belonging to Berserker unit) while on guard duty at Dock 16, Menasa Harbor, during landing operations of new WAP parts. Engaged with Berserkers on a mission to clear the remaining defeated troops in the Kaydins jungle area.

Rich used the remaining troops to set up an engagement between Storm Squad and Berserker Squad, but the Berserkers counterattacked Storm Squad and retreated. The Berserkers then retreated after receiving a counterattack from the Stormers. The Stormers, having received intelligence from the military high command, then engaged the Berserkers in a supply operation in the Roxta Desert. Later that day, the mercenary base is attacked by the Berserker unit, but the Storm unit successfully counterattacks and eliminates them. The members of the unit are killed.

The storyline involving Monk/Rachel, a "parallel" that is a branch in the BoM and only one of the scenarios can be played, but for convenience, we have grouped them together as a continuous storyline. If the Storm Team had not been involved, Monk might have been dropped by someone else, and Rachel might have been erased without ever escaping the island.

One can't help but feel the unreasonableness of the incident in the end, that Rachel would have ended up with the same fate whether she had been saved by the Storm Team or not.

[Storm team] Battle around the arena

Peseta's arena protection mission, destroyed a Korga that was repeatedly attacking WAPs entering the arena as a target. It also engaged the Dark Knight, but the aircraft withdrew.

Later, in the Meer River basin east of the Roxta Desert, the arena contestant WAP led by Monk is engaged in battle, but Monk and Champ, old acquaintances, reconcile. Monk dies as a result of sanction by the Manticore, who judges this to be an act of treachery. The Manticore leaves the front line, but the Storm Force pursues it and defeats it near the northern edge of the Parunta Desert.

[Storm team] Mr. Perkins' assistance with the interview.

Storm team took custody of Rachel Perkins and others who were missing while conducting interviews in the Governing Area (south of Peceta?). The Storm team protected Rachel Perkins and others who went missing while conducting a news story in the Governing Area (south of Peceta?). In the ensuing battle with guerrillas, Perkins and two others were wounded, Johnston was unconscious and in critical condition, and the driver was killed.

A few days later's orders from the upper echelons of the military, he engaged in combat with Death while guarding Perkins, who was working on an interview at the site of a facility north of Peseta built during the settlement of Huffman Island, and defeated him.

C.I.S.U. believes that Perkins' suicide was an attempt to keep quiet about a series of incidents, including the PS Project.

[Chariot team] Encounter with Bahamut, collapse of base.

The Chariot team encountered Bahamut, who was trying to secure the elemental body, in two successive operations, and Sana was abducted in the third engagement. Jose was critically injured in this engagement and repatriated.

With only Tornado, Mist, and Napalm in force, the Vampires launched an assault on the base with WAP forces, including large mobile weapons.

Receiving a distress signal, he and Glen Duval rushed from a nearby base to counter the signal. They destroyed the vampires, but the base was subsequently destroyed by airstrikes by bombers.

Tornado and Mist left the base with Duvall, and Napalm, who was caught in the bombing, was saved by Lloyd Clive and other troops who later arrived to help.

Tornado and others received a chase from Wilm, which they counterattacked. Wilm was killed in the explosion.

Subsequently, an investigation into the attack was conducted by the O.C.U. military, but it was treated as a non-incidental explosion, 22 staff members were evacuated, and no one was reported injured or missing.

Tornado and Mist, who had lost their way, stopped at the O.C.U. military base to which Duvall belonged, and registered in the suburbs of Peseta and other areas.

He was involved in riot control missions for Nance and others.

The bomber that bombed the base is said to be a plane of unknown affiliation (its identity is not stated in the game), and when considered together with the mysterious announcement by the O.C.U. military, it is natural to assume that the Vampires did not possess the bomber, but that it was a bomber secretly sent out by the O.C.U. military.

[Tornado Unit begins operations as an independent unit.

Tornado and others leave the O.C.U. military base and begin gathering information on the abduction of Sana as an independent unit (Tornado Squad) based in a rented hangar facility owned by Rykov.

Mist sent out a single plane to search for a Hephaist squadron that had disappeared in a mountainous area in O.C.U. territory, and soon after encountered the squadron.

After passing through a mountainous area, they found a base of the Vampires' s base and destroyed it with Tornado, who had joined them.

After the battle, Hephaisto was relieved of his unit and went to Storm Squadron, commanded by his old friend Falcon. Huynh and Bacchus were to join the Tornado Squadron.

[Delta Force is destroyed by Nightmare.

(On the west side of Fort Morgan Highlands?) Encountered a nightmare while escorting a convoy. With reinforcements from the Delta Force, it was eliminated.

Later, at the request of the military top brass, they conducted a joint operation with the Delta Force near Belchica, but the Delta Force that preceded them was destroyed by the Nightmare and its members were abducted.

After receiving a request from the military top brass to rescue the Delta unit members, they went out and defeated the nightmare near the western border of Peseta. The members were tortured, and Captain Faithless was transported to another location to be used as a body and is missing. The other members of the unit were confirmed dead.

A journal left by Faithless was found at the scene and provided the Storm team with information about the Vampires being a mercenary unit of the Sakata Corporation and the unit's purpose.

[Operation Vampires begins.

Initially, the military did not conduct any investigative activities after receiving reports of missing mercenaries, but it officially launched Operation Vampires against Vampires, a government-planned operation. In place of the regular army, whose activities were restricted by the cease-fire agreement, the Storm Team joined the operation, and its main mission was to destroy the Numbers.

First, the Vampires' outpost west of Menasa was overrun. Shaitan and Efrete died.

Then, in concert with the Dark Knight, who had betrayed the unit, they simultaneously raided and successfully overrun an airborne base and a fortified factory at the foot of Mt. Wayne.

Rich, who felt threatened by the storm troop's offensive, requested Sakata Corp. s (Sakata's?) request to restrict the activities of the Vampires. On the other hand, Rich is informed that the military is skeptical about the work of the Vampires, suggesting that Sakata is giving up on the Vampires as well.

[Tornado Squad] To the Heart of the Vampires

The Tornado Squadron, based on information obtained from the Storm Squadron via Rykov, sortied

into the Roxta Desert southwest of Freedom, where the Berserker Squadron was resupplying. They were engaged by Barbarians and Werewolves.

He encountered Ghost at the PS Plan research facility where Mist was previously housed.

Although he had a battle with the capture team that was tracking Ghost, he was able to protect Rage and transport him to the base, but he died shortly afterwards.

[The attack on the Vampires' base is in full swing.]

The Dark Knight was revealed to be C.I.S.U. investigator Roy, and under his command, Storm Squad completed the operation to take control of the bridge northeast of Peseta, which leads to an important base. This divided the Vampires' forces.

Meanwhile, the Vampires' forces, including large aircraft, attempted to attack the base against the Tornados, but they were swept away. The Tornados were able to successfully locate the Vampires' base using the surrendered soldiers they had protected and the large aircraft they had captured.

The storm team engaged the daemons and dragoon with vampires at the south side of the Wayne Mountains foothills. The vampire was transported to the mage squad, but the remaining two were destroyed. Attempts were made to rescue Dragoon (Lancer), but his self-destruct mechanism was triggered and he died.

Lost.

Soon after, enemy reinforcements arrive, but the Tornados encounter them on their way to the Vampires' fortress and engage and destroy them, replacing the storm troopers who are pursuing the Vampires.

[Storm team, Tornado team] Vampires Collapse

The Storm team pursued the Vampires and arrived at the Vampires' fortress north of Freedom, but the Vampires were transported (to Greylock?) again before their eyes. .

After Roy broke off after this, the mage squad used a biojammer to capture Hephaist, Odd Eye, Gray, and Champ. Storm and Lane escaped and returned, but Lane was seriously wounded.

Soon after, Roy's investigation identified where the team members were being transported to, and two aircraft, Storm and Roy, rescued Champ and Gray.

Tornado squad found Valkyrie (Sana) at Vampires' fortress. They engaged the squad and defeated Bahamut, but lost Hyun and Bacchus. The Doll Master fled with Valkyrie.

Later, together with Captain Jose and Adjutant Hinata of the O.C.U. regular army, they raid the PS Plan laboratory where the Doll Master had escaped and protect Sana. The Doll Master is killed.

Vampires virtually collapsed due to the betrayal of Sakata Industrie.

The Storm Squadron (Storm, Champ, and Gray) led an undead squadron composed of prototype aircraft to destroy the Mage Squadron, which was preparing to flee, at a port west of Mt. Wayne.

[Storm and Tornado units] Main base suppression

Jose and Hinata joined the Tornado Squad. They broke through the Vampires' home defense line and defeated Cerberus Squad except for Raven.

A battle ensued in the facility, but Raven took advantage of a runaway in the facility's power unit to blow up the base, causing it to completely collapse. Raven escaped. An O.C.U. regular army unit led by Sana arrives on the scene.

Storm Squad engages the Vampires at a medical facility near Greylock. Odd Eye returns, but Hephaist is killed. The Vampires went all out but were overpowered, Rich was killed, and Faithless was protected, albeit seriously wounded (he was transported to a medical facility in his home country and died a few days later).

Operation Vampires ends.

In his depiction in the BoM, Roy seems to have been aware that "the Tornado Squadron was a separate unit of the Storm Squadron" in the operation against the Vampires.

In 2089-II, on the other hand, there is no depiction of Roy giving instructions or information to Tornado, and the only connection between the two units is after Mission 52, when Strom communicates to Tornado to work with him.

[Storm team and Chariot team] B. Organizational survey

In the suburbs of Freedom, the Storm Team protects Aisha Romariaf, who is being chased by the B Organization. They take her to the airport to send her back to her home country, but she is attacked again by the B Organization and abducted.

After searching the Greylock facility and the northern Parunta Desert area, they succeeded in locating a medical facility east of Freedom from Romariaf's belongings. As a result of their investigations at the facility, they were strongly suspected to be in another facility called Building B, and together with the Chariot team, they carried out a rescue operation. They were able to protect her. This operation also revealed the research contents of the facility and the organization.

The Storm team then investigated a research facility east of Freedom, where the B1 prototype was being tested. In addition, the

Conducted a forced reconnaissance of a research facility in the Larkas area of U.S.N. territory and engaged U.S.N. regular forces.

The information obtained from this operation revealed that the core system of the bio-weapon was in the mass production stage, that plans were underway to convert the WAP control device using the brain marrow to the X-00 type, and that the research and development center was located.

Storm team completed the operation to suppress the B Organization base west of Belchica.

All X-00 experimental machines destroyed; Organization B abandons the facility. Dr. Midget Brown and Dr.

Raikov

It is said that there is no WAP? engineer who has not heard of Rykov, and also that weapons testing is notoriously hard.

The company provides weapons support to special forces and mercenary units on Huffman Island, including providing special parts to the Storm Corps for their anti-vampires.

After the dismantling of Vampires, he moved back to his home country to continue his research.

lancer

He is the commander of a mercenary unit of the O.C.U. Army Defense Force, 1st Army Mechanized Division, Border Maintenance Unit. Before coming to Huffman Island, he was a mercenary in other war zones.

In the early summer of 2089, he was attacked by the Vampires and abducted along with five members of the squad. The members were taken hostage and forced to serve with the squad as Dragoon of Numbers.

During the engagement of the Storm Squadron, he had the opportunity to escape from the Numbers, but was unable to escape from the WAP and was killed in the explosion due to the eraser activation.

Lancer Corps

A mercenary unit of the O.C.U. Army Defense Forces.

In 2089, a few days before Salinger's (Storm) arrival, he encountered mercenary-hunting Vampires, who abducted all but Rain and Buggy, who were determined to be Puppet Soldier-qualified. Captain Lancer, with his family and other members taken hostage, signed a contract to become a member of the Vampires and joined the Vampires in their abduction of the soldiers as X-24 Dragoon.
